Comments on Interfleet GPS/AVL

Ohio DOT (2008-2012) • Overall rating: 2

We did not have good results with the Interfleet system. We are hoping for better results with our newer systems.

Comments

Minnesota DOT (2007-2008) • Overall rating: 4

This was a great cost savings project, we had no accidents with fixed objects along the road when in use. The vendor was great to deal with and just a great all around project. There are plans to use this on the paving machine.

Montana DOT (2013-15) • Overall rating: 4

To early to tell.

Utah DOT (2007-2008) • Overall rating: 5

Our field crews installed the units without having to use the central shops. We cut back avoidable hits by 85% overall. The worse the conditions the more help the laser unit is. Overall, we are very pleased with the GL3000C.
